

The Iron Yard

Final Project
July 2015

Sam Grayson & Clayton Kinder

Elevator

- ELEFGEE is your go to site to find other people to play games with. Many games don't have built in group finders, our app is in place to make this process as simple and enjoyable as possible.

Technologies

- Angular
- STEAM API
- JQuery
- JavaScript
- SCSS/CSS/HTML
- BOOTSTRAP
- IONIC (RoadMap)

Features (MVP)

- (1) Steam authentication log-in
- (2) Ability to post LFG requests
- (3) CRUD on LFG Posts
- (4) Steam Message/Private Message
- (5) Score System for helpfulness/user review

Roadmap (future development)

- Mobile app using Ionic
- User Auth and linking different accounts (ex: Blizzard, Steam, PS4, Xbox, Origin)
 - Using different API for different services
- Discount/Reward model for user score

User Stories

Steam authentication log-in

Size: *Large*

Value Statement:

- *As a user of ELEFGEE, I need the ability to log in through my steam account to get access to many of the features that it offers.*

Assumptions:

1. *User has steam account*
2. *Steam API log-in works with application*

Acceptance:

- *To be able to view your profile on log-in and see user's game list.*

Notes:

Ability to post LFG requests

Size: *Ex - Large*

Value Statement:

- *As a user of ELEFGEE, I need the ability post LFG requests so I may group up and play games with others.*

Assumptions:

1. *User is logged into Steam Account*
2. *User owns games on Steam Account*
3. *CRUD services work*

Acceptance:

- Users are able to view their posts as well as the posts of others on the main page.

Notes:

CRUD on LFG Posts

Size: *Large*

Value Statement:

- *As a user of ELEFGEE, I need the ability update my posts, delete my posts, and get the posts of others on the main feed*

Assumptions:

1. *Post is covered in another story*
2. *Steam authentication will work well with updating specific posts*
3. *User is logged into Steam Account and can view posts.*

Acceptance:

- Users are able to view their posts as well as the posts of others on the main page. BUT are only able to update and delete their own posts

Notes:

Steam Message/Private Message

Size: *Small*

Value Statement:

- *As a user of ELEFGEE, I need the ability to send private messages through the app or through steam itself to communicate with those who are looking for a group.*

Assumptions:

1. *Users are logged in to steam*
2. *Users have access to other user's accounts and can view their posts*

Acceptance:

- *Users are able to send messages and view messages sent to them.*

Notes:

Score System for helpfulness/user review

Size: *Medium*

Value Statement:

- *As a user of ELEFGEE, I need the ability to be able to view a users "score" so that I may tell if they are a compatible user for a group. This value will also help users take their groups seriously and be kind to others.*

Assumptions:

1. *User is logged into app*
2. *The updating of score will be handled by the users of the app.*

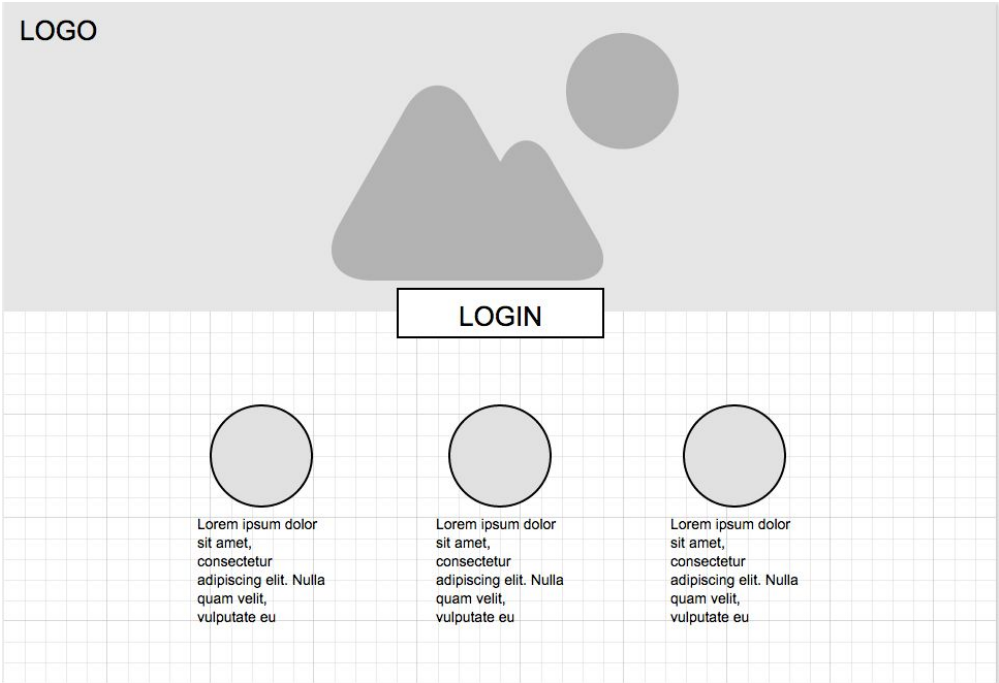

Acceptance:

- *Users are given a positive or negative score by those they play with. This score is viewable by the user as well as others.*
